*Division of Cancer Control and Population Sciences*

# Estimated cancer prevalence by age in the U.S. population

Shirley M. Bluethmann et al. Cancer Epidemiol Biomarkers  
Prev 2016;25:1029-1036

# High quality, patient-centered care in oncology is needed

# CAHPS® for Cancer Care Offers...

- An unprecedented opportunity to evaluate care experiences that are unique to cancer
- Separate instruments by treatment modality, including surgical, radiation, and medical oncology
- Assessments relevant to many stakeholder groups
- Domains salient to cancer patients, including enabling patient self-management, care coordination
- Instruments developed in concert with clinical partners in oncology settings and stemming from other CAHPS surveys
- As users (like you!) begin to adopt these surveys, we at NCI and AHRQ are interested in the application and uses of the data
