

Health Care Quality: How Does Your State Compare?

AHRQ's 2017 **State Snapshots** feature more than 250 statistical measures to provide State-by-State summaries of health care quality. Examples in this illustration show top-scoring States in 2015 in three areas – reducing breast cancer death rates, encouraging hospice care teams to provide assistance to patients and their families, and ensuring stroke patients receive blood clot prevention medication. Access the online **State Snapshots** for quality information on all 50 States and the District of Columbia.
