

CATEGORY	INTERVENTION COMPONENTS	CODE (1-4)
<b>A. POINT-OF-CARE CLINICAL DECISION SUPPORT*</b>	Reminder to order aspirin/antiplatelet drug for pts with IVD (or CVD)	
	Alert staff to a patient with uncontrolled blood pressure	
	Alert for a lipid panel (or cholesterol) in ASCVD (or IVD, or CVD)	
	Alert for a lipid panel (or cholesterol) in diabetes mellitus	
	Alert for a lipid panel in general population (low risk patients)	
	Reminder to order a statin in ASCVD (or IVD, or CVD)	
	Reminder to order statin in diabetic patients	
	Alert to order a statin in pts with LDL $\geq$ 190	
	Alert to order statin in general population with increased risk (based on a risk calculator)	
	Reminder to order aspirin for primary prevention in appropriate patients	
	Reminder for intervention in tobacco users or smokers	
<b>B. OTHER CLINICAL DECISION SUPPORT ACTIVITIES*</b>	Orders/patient instructions/education for home blood pressure monitoring	
	Patient education on cholesterol and/or cholesterol treatment	
	Standing orders for lipid profiles	
	Patient education on tobacco cessation	
<b>C. PRACTICE WORKFLOWS</b>	Blood pressure measurement protocol	
	Blood pressure treatment protocol	
	Workflow for patient to report home blood pressures	
	Tobacco use/smoking assessment part of intake or rooming process	
	Clinic-based tobacco use/smoking interventions	
<b>D. REPORTS ON ABCS PERFORMANCE</b>	Metric for use of aspirin or another antithrombotic therapy in IVD	
	Metric for blood pressure control among patients with hypertension	
	Metric for cholesterol treatment or control	
	Metric for tobacco use assessment and brief intervention	
<b>E. POPULATION MANAGEMENT: LISTS OF PATIENTS NOT MEETING ABCS MEASURES</b>	List of patients with IVD not meeting aspirin/antithrombotic measure	
	List of patients with uncontrolled blood pressure	
	List of patients needing cholesterol measurement and/or treatment	
	List of tobacco users/smokers	
<b>F. POPULATION MANAGEMENT: OUTREACH</b>	Outreach to patients with IVD not on aspirin or another antithrombotic	
	Outreach to patients with uncontrolled hypertension	
	Outreach to patients who need cholesterol measurement or statin prescription	
	Outreach to tobacco users or smokers	
	Outreach to patients with increased CVD risk who are not on a statin for primary prevention	
<b>G. POPULATION MANAGEMENT: COMMUNITY RESOURCES</b>	Referral to community pharmacist for hypertension medication management	
	Referral to HealtheRx resource**	

\* Code clinical decision support interventions as 1, 2 or 4 (do not code as 3)

\*\* Only collect data on HealtheRx referral intervention for POC+PM practices (do not collect data for POC practices)
