

Heart disease is the primary cause of death in New York City.

HealthyHearts NYC aims to transform health care delivery by helping primary care providers improve the heart health of their patients. **HealthyHearts NYC** strives to equip primary care practices with the support and resources they need to help their patients adopt the **ABCS** of cardiovascular disease prevention:

- **A**spirin as appropriate
- **B**lood pressure control
- **C**holesterol management
- **S**moking cessation

Participation in this project is **free!** Benefits include:

- ✓ Alignment with Meaningful Use as well as new and emerging New York State and federal policies such as NYS Delivery System Reform Incentive Payment program (DSRIP), and Patient Centered Medical Home.
- ✓ On-site and virtual technical assistance on quality improvement strategies, including:
 - Optimization of electronic health record utilization and clinical workflows
 - Utilizing dashboards to enhance patient self-management support
 - Improvement of billing and care coordination through workflow development and assessment
- ✓ Opportunities to attend peer-to-peer learning collaboratives where you will be able to share and learn about best practices being implemented in other primary care practices.
- ✓ Honorarium of \$4,500 over the course of three years of participation

Be part of a national initiative impacting approximately 8 million people.
