

Decolonization of Non-ICU Patients With Devices

Section 13-3 – Staff Huddle Reminder: Wound Cleaning With Chlorhexidine

- Do not forget to clean wounds! Cleaning wounds prevents surface bacteria from entering the body and causing infection.
- Clean **ALL wounds** unless deep or packed. Be sure to clean superficial wounds, closed surgical incisions, stage 1 and 2 decubitus ulcers, friable skin/rashes, and superficial burns.
- CHG should be applied over any semipermeable or occlusive dressing.
- Patients feel uncomfortable cleaning their wounds. Staff **HAVE TO HELP** clean them.
- Staff: Use a clean CHG cloth to clean patient's wounds after showering.
