

## **Bibliography for the AHRQ Research Centers for Excellence in Clinical Preventive Services**

Each of the AHRQ Research Centers for Excellence in Clinical Preventive Services published articles from their research projects and developed other materials from the activities of their Center core which help to advance the field of their area of focus (health equity, reducing patient harms, and health care implementation). Publications and other materials developed by each Center as of September 2014 are listed below. Additional manuscripts and materials developed as a result of this work will continue to be published and posted online.
