Q&A

Resources

[Module 7 Troubleshooting your Automatic Referral](#)

This module builds upon Module 5 which discussed how to build an automatic referral (AR) order set. Expert speakers will cover areas such as how to test the AR order set, prepare for go-live, and developing a data and monitoring plan.

Topics covered in this module include:

- Automatic referral testing.
- Staff training.
- Roll-out and reinforcement of automatic referral.
- Evaluation and improvement of automatic referral.
- Extending and spreading automatic referral use.
